# Introduction

- FLOSS history and Computer science history are very parallel.
- Because, in the beginning, first computers always were “open sourced”.
- For example, in the 60s, software was accompanying hardware, and source code could be modified by anyone...
- ... and shared with others.

# Introduction

- In these days, some scientists appeared, related with first commercial computers.

open

# Introduction

- Since these days to today, FLOSS culture (and technology) evolution has been always driven by some people.

open  
sistemas

# Introduction

- Since these days to today, FLOSS culture (and technology) evolution has been always driven by some people.
- People with name and surname which have contributed something crucial for that moment.

# Introduction

- Since these days to today, FLOSS culture (and technology) evolution has been always driven by some people.
- People with name and surname which have contributed something crucial for that moment.
- These people will be called by us “**FLOSS Leaders**”.

# Overview of this unit

- In this unit, we will see, in historical order, some key people in libre software field.
- This unit will be organised in an interactive manner:
- First, we will give you some names and photographs...
- ... and you will be the responsible of investigate all about them.
- The exercises will consist in, preparation of a slides presentation with the information you have investigated.
